Wixom, Michigan – February 27, 2008

WIXOM WELCOMES NXTGEN EMISSION CONTROLS, INC.

The City of Wixom welcomes NxtGen Emission Controls as a new corporate resident.

NxtGen Emission Controls, Inc. has chosen Wixom over a competing site in Windsor, Canada for the home of their new United States Headquarters. Located in the Century Industrial Park, administration, research and development, and manufacturing will be conducted in the 8,200 sq. ft. facility. It is anticipated that 47 direct and 59 indirect jobs will be created by NxtGen.

NxtGen Emission Controls, Inc provides a cost effective solution that reduced diesel engine emissions and increases fuel economy using syngas technology.

Wixom Mayor, Kevin W. Hinkley, credits the Michigan Economic Development Corporation, Oakland County Planning & Economic Development and the City with developing an attractive incentive package for NxtGen. He further credits the business friendly culture of City Hall with a recent string of successful business recruitments.
