DTE ENERGY ANNOUNCES “YOUR ENERGY SAVINGS APPLIANCE RECYCLING PROGRAM

In August, DTE Energy began dismantling more than 1,000 old refrigerators turned in by Detroit Edison customers as part of the Your Energy Savings Appliance Recycling program which it launched in June. “The removal of these old, inefficient refrigerators is an easy way for customers to make their homes more energy efficient. They can save money by using less energy and help the environment at the same time”, said Steven Kurmas, Detroit Edison’s President and Chief Operator Officer. This program offers Detroit Edison customers \$50 for their older model refrigerators and freezers and hauls them away for free. See the link below to access further requirements and information.

More Energy Savings programs are available:

Energy Star – compact fluorescent light bulbs starting under 99 cents are now available at ACO, Home Depot, Meijer, Costco and Sam’s Club (Kroger starting in Oct.)

Energy Audits & Weatherization – receive a customized analysis of energy use in your home or business and information on how to reduce your energy costs.

Heating, Cooling and Water Heating – get up to a \$350 rebate for replacing your hold model with a qualified unit offered through the Your Energy Savings program.

Energy Efficiency Assistance – for customers having trouble managing their energy bill, the Your Energy Savings (sm) program offers assistance. We’ll help you make improvements to your existing home at no cost if you meet the qualifications.
